

MODELS 710-711

A three-part conference unit with two folding wing panels which close to form an attractive box frame in wood,

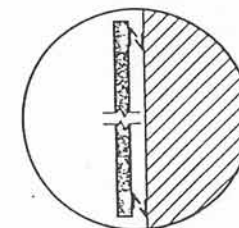

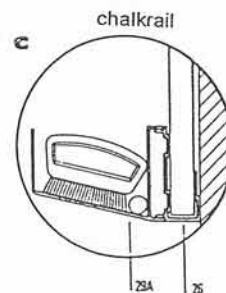

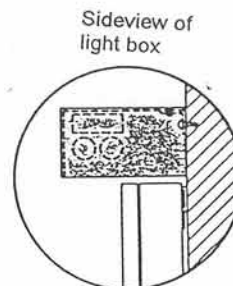

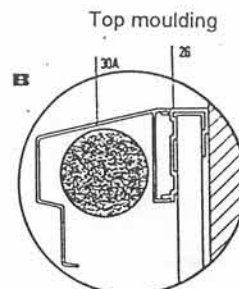

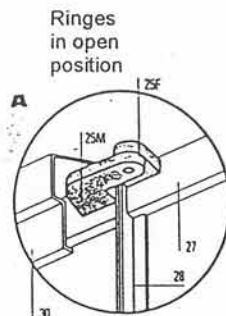

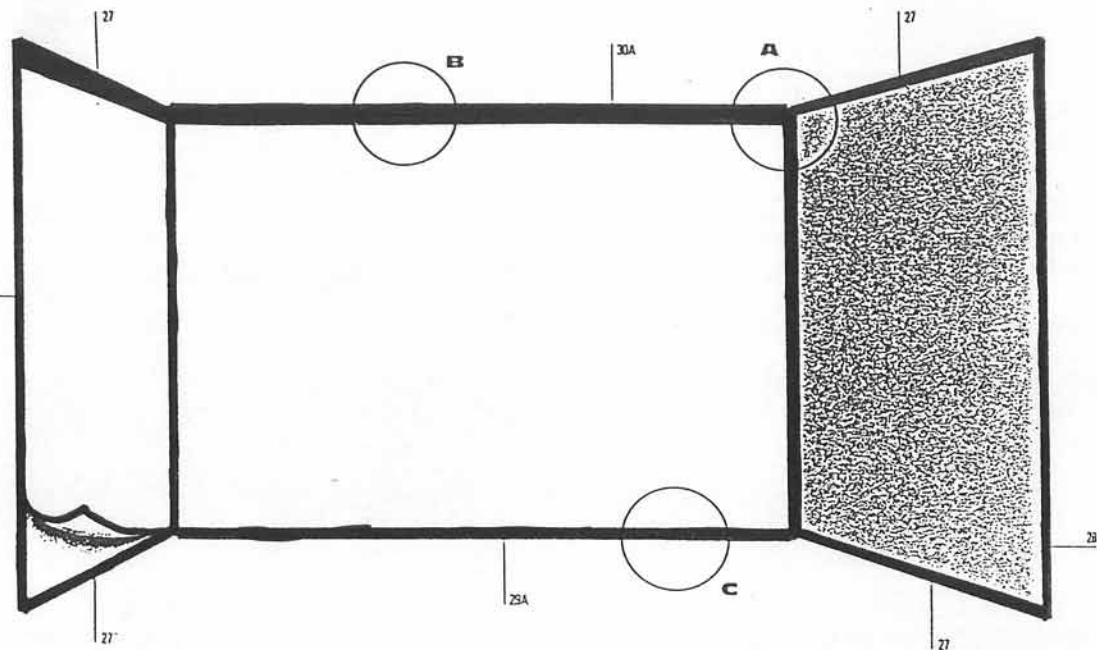

simulated wood or other finishes. Solid-aluminum interior mouldings are available in 3 shades.

The ingenious closing mechanism is activated by solid-aluminum horizontal strap hinges, functionally and

stylishly designed for holding panels under pressure.

A panel-height chalkrail stores brushes and chalk when the unit is closed.

The upper moulding can hold a projection screen. An optional lighting system can be enclosed in a finished casing matching the panels. Flip-charts are also available.

space provided for projection screen installation

attach suspension bar to wall hang board
